Dear Patient,

You have been referred to the Lung Diagnostic Assessment Program (DAP) to find out more about your lung issue.

At your first appointment, you will receive information about any tests that will be used to diagnose your lung issue and any follow up tests or appointments.

ABOUT THE LUNG DIAGNOSTIC ASSESSMENT PROGRAM (DAP)

The Lung DAP is a program coordinated through the Thunder Bay Regional Health Sciences Centre (TBRHSC). The program is new and is supported by a team of specialists within the hospital and community. Primary care providers may refer patients to the program. The health care providers involved in your care are kept informed about the tests and appointments being planned.

The program is designed to provide more timely access and improve the coordination of the lung diagnostic services at TBRHSC. Our program navigators will arrange the tests, procedures and appointments that you may need in order to be assessed as quickly as possible

Should you have any questions about the assessment process, please feel free to contact Joanne at Dr. Gehman's office at 807.345.4337 Ext. 2.

Sincerely,

The Lung Diagnostic Assessment Program
